About me

Programmer with versatile experience in IT and computer science. I do believe that modern scientific research process requires significant programming skills. Seeking a position as a developer-researcher to enhance my career growth.

Education

2013 — 2017 **Bachelor degree**, *Saint-Petersburg*, Peter the Great St.Petersburg Polytechnic University, department of applied mathematics and mechanics.

2017 — 2019 **Master degree**, *Saint-Petersburg*, Peter the Great St.Petersburg Polytechnic University, department of applied mathematics and mechanics.

Master thesis

2019 **Special kernel density estimator for finite sample size conditions.**

Work is dedicated to research of theoretical accuracy of statistical kernel density estimator of special type for finite sample size conditions.

Experience: 4 years

august 2019 — now **Saint-Petersburg State University, Chebyshev Laboratory**, *engineer-researcher*.

- Team work on developement of statistical instruments for geo-data analysis and seismic inversion. There we extensively used various Gaussian process based regression models (for example, multi-output GP or sparse GP) and various technics for data-processing. Also I helped with research for relevant scientific articles and automated several research pipelines.
- Development MVP for the tool for fine-tuning advanced hydrodynamic simulations in Dumux with Bayesian optimization techniques. Here I also was responsible for building custom UI with PyQt5. Among other things as a researcher I took part in implementing experimental software for solving Riemann problems, which appear in porous media hydrodynamics.
- Last but not least, I take part in local LMS maintaining/management, where my job responsibilities include system administator and devops tasks.

Skills

Programming languages: Python [advanced], C/C++ [medium], SQL, R and Javascript [basic];

Mathematical background:	Mathematical statistics and probability theory (random functions and fields), linear algebra, calculus.
Computer science background:	Standard course of algorithms and numerical methods, various optimization methods, statistical data analysis: LDA, PCA, hypothesis testing, ML: regression, table data classification.
More information and keywords:	<ul style="list-style-type: none"> ○ General purpose skills: <ul style="list-style-type: none"> - Many years of experience with different Linux distributions, system configuration, terminal (bash, Unix commands); - Proficient with Git, managing repositories: pull-requests, Github Actions CI, reviews; Notion for task-tracking; - Remote access via ssh, familiar with Docker and docker-compose; - Extensive experience with Python toolchain and ecosystem: building up Python packages from scratch with setuptools, managing packages and project installations with venv or Anaconda; ○ Experience as engineer-researcher: <ul style="list-style-type: none"> - Work on project sketches in Jupyter Notebooks and Google Colab; - Proficient with numpy, pandas, sklearn; GPFlow, GPy for work with GP models; botorch, bayes_opt for Bayesian optimization, gradient boosting with CatBoost; experience with Torch framework; - Advanced work with LaTeX for scientific texts and presentations; ○ Some experience from desktop-dev: <ul style="list-style-type: none"> - UI development with PyQt5, Qt Creator IDE, PyInstaller for bulding binaries; - Experience in writing detailed documentation for code and UI; ○ Some experience from web-dev: <ul style="list-style-type: none"> - Some experience from backend, sufficient to develop inelaborate microservice from scratch: HTTP protocol, Django ecosystem (ORM, REST Framework, Postman), Nginx and databases like PostgreSQL, SQLite, Redis; - Some experience from frontend: HTML, CSS/SCSS, basic knowledge of Javascript ecosystem (npm, React.js, axios); ○ Some experience with C/C++ (parallel computations with OpenMP, make-files and CMake, building small .so libs), linking C++ and Python via Ctypes;

English Upper-Intermediate

Online courses

Stepik October 2022

Hadoop. System for big data processing.

Learned basic things about Hadoop ecosystem, including HDFS and MapReduce.

Result: certificate with distinction, >90% score.

Stepik January 2023

Apache Airflow for analysts.

Learned basic things about Apache Airflow, DAGs and ETL in general.

Result: certificate.
